the European Union

About this report

Grant Agreement 101100604 - DIGITAL-2022-TRAINING-02

Action Acronym BioNT

Action Title Bio Network for Training

Deliverable 6.1 Project website

Work package 6 Community and capacity building

Dissemination level Public

Authors R. Müller, approved by all BioNT partners

Delivery date 2026-03-17

Consortium members

Acronym	Partner
EMBL	EUROPEAN MOLECULAR BIOLOGY LABORATORY
BIOBYTE	BIOBYTE SOLUTIONS GMBH
HPCNOW	HPC NOW CONSULTING SL
UO	UNIVERSITETET I OSLO
UB	UNIVERSITAT DE BARCELONA
ZBMED	INFORMATION CENTRE FOR LIFE SCIENCE
Rlcapacity	Rlcapacity

Project Overview

The BioNT consortium is dedicated to providing a comprehensive training program and fostering a community for digital skills relevant to the biotechnology industry and biomedical sector. With a curriculum tailored for both beginners and advanced professionals, BioNT aims to equip individuals with the necessary expertise in handling, processing, and visualising biological data, as well as utilising computational biology tools. Leveraging the consortium's strong background in digital literacy training and extensive network of collaborations, BioNT is poised to professionalise life sciences data management, processing, and analysis skills.

Preface

This report documents the establishment and publication of the BioNT project website as required under Deliverable 6.1 of Work Package 6 (Community and Capacity Building). The intended readership encompasses consortium partners, the European Commission, and the wider public, including training communities, potential adopters of BioNT materials, and professionals with an interest in digital skills development for the biotechnology and biomedical sectors.

Project website

The BioNT project website is publicly accessible at <https://biont-training.eu>. It serves as the central communication and dissemination hub of the consortium, providing information on the training programme, upcoming events, consortium partners, community initiatives such as the Ambassador Programme, and openly accessible resources including survey outputs and a code of conduct. Preparation of the website began on 27 March 2023 and the site was published in October 2023. The website template is published and maintained by ZB MED, Information Centre for Life Science on behalf of the consortium. ZB MED commits to hosting and maintaining the website for five years beyond the end of the project funding period, ensuring continued public access to BioNT's outputs and resources.
